Professional Summary

Manual Tester with 3+ years of experience in the **Capital Markets** domain, specializing in functional, regression, and end-to-end testing of trading applications. Skilled in test case design, execution, defect tracking, and Agile (Scrum) methodologies. Hands-on experience with Order Management Systems (OMS), trade lifecycle validation, and SQL-based data validation. Proficient in Jira, Redmine, Postman (API Testing), and database testing. Currently upskilling in Web Development with HTML, CSS, and JavaScript. Focused on delivering high-quality software by identifying critical defects and improving test coverage.

Technical Skills (Hard Skills)

- **Software Testing:** Manual Testing, SDLC, STLC, Test Case Creation, Scenario Identification, Defect Tracking, Functional Testing, Regression Testing, Smoke & Sanity Testing, Defect Life Cycle
- **Database Skills:** SQL (Joins, Data Validation)
- **Programming / Markup Languages:** HTML, CSS, JavaScript
- **Tools:** Redmine, Jira, MS Excel, Postman (API Testing)
- **IDE:** Visual Studio Code

Soft Skills

- Attention to Detail, Analytical Thinking, Problem Solving
- Communication Skills, Team Collaboration, Adaptability

Domain Expertise

- Capital Markets, Trade Life Cycle, Order Management System (OMS), Risk Management System (RMS), Equity and Derivatives, Clearing & Settlement
- **Trading Platforms:** NEST Trader (Order Execution & Trade Validation)

Professional Experience

AQM Technologies Pvt. Ltd.

Test Engineer | 2023 – Present

- Executed comprehensive testing (functional, regression, smoke and sanity) for Order Management System (OMS) and Risk Management System (RMS) in web and mobile trading applications.
- Designed test cases and scenarios that improved test coverage and reduced post-release defects.
- Managed full defect lifecycle using Jira and Redmine, collaborating effectively with development and client teams.
- Actively participated in Agile Scrum ceremonies and prepared clear status reports on progress, risks and mitigation strategies.

Notable Projects

Nuvama (Edelweiss)

- Conducted end-to-end testing of OMS for Equity and Derivatives modules, ensuring accurate trade execution and settlement.
 - Validated RMS rules at dealer and client levels to maintain trading accuracy and risk control
 - Delivered a **30% reduction** in post-release defects through targeted regression and sanity testing
 - Performed SQL-based data validation and test data management using MS Excel
-

63 Moons – ARMS, OMS

- Tested Front Office modules (OMS, RMS and UI) to ensure system accuracy and stability.
 - Created detailed test cases and worked closely with stakeholders for timely defect resolution.
 - Logged, monitored, and revalidated defects, ensuring timely resolution and **improving overall system reliability**
 - Performed regression, smoke and sanity testing for complete end-to-end flows.
-

Clearing Corporation of India Ltd (CCIL)

- Handled functional, regression and database testing for Trade Capture, Fund Obligation, Security Obligation, Instruction Generation and Shortages modules
 - Validated complex settlement cycles (T, T+1, T+N), message types, pre-funding, and shortage handling processes
 - Executed SQL queries for backend validation and raised defects across multiple workflows with adaptability
-

Education

- **Master of Computer Applications (MCA), Computer Science & IT**
Jain University, 2024 — **Distinction**
 - **Bachelor of Science (B.Sc. IT)**
University of Mumbai, 2022 — **Distinction**
-

Certifications

- **ISTQB Certified Tester – Foundation Level (CTFL)**
International Software Testing Qualifications Board
- **NCFM – Financial Markets: A Beginner's Module**
- **NCFM – Equity Derivatives: A Beginner's Module**
